

Barjo Bespoke Front Dog Guard Mini Clubman 2007-2014 Fitting Instructions

Before starting the tailgate guard fitting please read the instructions fully. Barjo recommends the fitter has an assistant to help fit the guard.

Barjo Cages & Guards Limited cannot accept responsibility for any damage incurred while fitting or from use of the tailgate guard. If the person fitting the tailgate guard has any doubt about the fitting, please contact a member of the Barjo team on Tel: 01189 890 240 from Monday to Friday (09.00 – 17.00) or via email info@barjo.co.uk

The fittings supplied will fit in place of the handles above the rear passenger doors. Remove the screws from the front side of the handles and screw in the two fittings, one on each side. They will look like this in place:

Fold the back seats all the way forward. Place the guard in the car through the rear doors. The feet of the guard will clip into place on the rear side of the folded seats. See below:

On top of the guard are two metal wrap around clips, one on either side. These will fit onto the bolts from the fittings on the handles and be secured with a wingnut.

Congratulations your Barjo front dog guard is now ready for use.

To clean your guard, use a weak solution of waxed car shampoo then dry fully. With all moving parts treat with WD40 or a light machine oil.
